

Certification

This is to certify that

Harshit Bajpai

successfully passed the examination for the

Certified RapidMiner Analyst.

The RapidMiner Analyst certification level is designed to demonstrate a complete understanding of how RapidMiner Studio works and is used. Certified professionals will be able to prepare data and create predictive models in standard data environments typically found within most analyst positions. The candidate has proven the ability to

- prepare data,
- build predictive models,
- evaluate the model's quality,
- score new data sets, and
- deploy machine learning models

with

- RapidMiner 9
